2. Trucks                      and sedan                      all of them with drivers wearing black-bordered blue epaulets, were                      at                      the flight control station. The eastern garage installation could not be observed because the board fence around the installation had been completed. The small cone-shaped antenna with disc on top had been re-erected in the depression near the pyrotechnic plant. A van-like truck was seen next to the antenna mast.

5. Between 9 a.m. and 1 p.m. on 19 April, 36 MiG-15s, 1 Il-28, 2 biplanes, and 1 high-wing monoplane were observed at Wiener Neustadt airfield. MiG-15s practiced flying. There was a 9/10 overcast at an altitude of about 1,800 meters, northwesterly wind at 25 km/h and good visibility. Five MiG-15s were parked in a row from north to south, west of the take-off strip near Madener Strasse. A command bus and a signal truck with red antennas were parked north-west of the MiG-15s. Up to 1 p.m., only one MiG-15 took off at 9:30 a.m. and landed at 9:57 a.m. and another MiG-15                      at 9:54 a.m. and landed at 10:01 a.m. Both aircraft had long cabins. The latter aircraft made a good take-off but, while landing, touched ground twice before taking; the latter aircraft hopped three times before it became airborne and touched ground several times before landing.

1.  Comment. So far two fighter regiments with a total of 50 MiG-15s were believed to be stationed at Wiener Neustadt airfield. The decreased number of aircraft observed at the field possibly accounts for the observation of MiG-15 at Bad Voesslau. Aircraft  previously reported from Wiener Neustadt.
2.  Comment. The personnel stationed at Wiener Neustadt airfield is quartered in Bad Fischau.
